

Introduction to JJWild

JJWild was founded by John J. Wild, Sr. in 1956. Today JJWild develops and delivers integrated IT solutions that empower healthcare organizations using the MEDITECH Healthcare Information System (HCIS) to improve healthcare delivery. Leveraging their in-depth technology and application consulting experience, JJWild offers comprehensive solutions that integrate people, processes, and technology to ensure healthcare organizations realize the full potential of their MEDITECH system. The company currently employs over 190 professionals – from technology experts to healthcare consultants.

Mission Statement

Our mission is to empower providers to improve healthcare delivery by designing and developing integrated IT solutions that optimize the long-term use of MEDITECH.

Blending technology and application expertise, JJWild leverages its experience to implement solutions in over 1000 MEDITECH healthcare organizations across the United States, Canada, and the United Kingdom. For over 20 years, the exclusive focus of the company has been on developing solutions that turn the potential of the MEDITECH investment into reality. JJWild's strength is our unmatched breadth and depth of MEDITECH knowledge and experience. Our long-term partnership with MEDITECH extends to every area of their business, products, and day-to-day operations.

Our team of 70 plus application consultants has years of experience with the MEDITECH modules – financial, administrative, as well as clinical. They're people who have actually served as caregivers, business leaders, and department managers in MEDITECH organizations, each with an average of 20 years healthcare experience. This gives us an unmatched capacity for understanding the real world needs of our hospital-based counterparts. Our leadership in the design and integration of technology and infrastructure solutions includes a solid understanding of network design, architecture, standards, and complex issues. Combined, this unparalleled technology and application expertise allows JJWild to design, implement, integrate, and optimize systems within a multi-vendor, traditional MAGIC, or Client/Server-computing environment.

JJWild's Core Solutions

JJWild offers a full range of products and services designed to optimize the value of your MEDITECH system throughout its lifetime. Whether you need a complete solution or are focusing on a specific strategy, JJWild customizes solutions to meet organizational needs, budgets, and resource availability. Our proven methodology is based on integrating the three essential enablers to success: people, process, and technology. The alignment of these three components is critical. JJWild can help you engage your workforce, transform your processes, and enable your technology to achieve your strategic goals.

Technology Solutions

JJWild will develop and deliver technology solutions that balance reliability, performance, scalability, and cost while ensuring compatibility with your MEDITECH HCIS.

Our Approach

Our approach in working with healthcare organizations is to develop a partnership in which we work collaboratively with all levels of your team to provide leadership, advice, and knowledge transfer to achieve the organization's objectives and ensure self-sufficiency.

An important JJWild differentiator is that your access to knowledge is not limited to the consultants assigned to any given project, but extends to our entire network of application and technology experts. This allows our consultants to leverage our internal knowledge base and provide you with unique perspectives and solutions to complex questions.

With unsurpassed expertise in MEDITECH, technology, and healthcare, JJWild is in a unique position to help you "achieve the power of MEDITECH". We would be delighted to talk to you further about your particular needs. Thank you for your consideration.
