Helping you unleash the full power of MEDITECH

Electronic newsletter published every 8 weeks

## **JJWild's Consulting Services Group helps you unleash the true "Power of M."**

Paul Peck, Vice President of Consulting

Our goal at JJWild is to help you realize the full promise and potential of the MEDITECH system, and to make the most of your MEDITECH investment. It's what we call "achieving the Power of M."

To that end, we've made a substantial investment in the development and advancement of our Consulting Services Group, a fast-growing organization that delivers tangible value to our MEDITECH clients throughout North America and the United Kingdom. Our complete range of offerings addresses all the elements of effective implementation, as well as best practice use of the complete MEDITECH portfolio of application software.

Of course, consulting isn't new to JJWild. We've always been seen as thought leaders and trusted advisors by hospitals who are seeking to efficiently and effectively deploy processing platforms and data storage systems in conjunction with MEDITECH software. Now we're able to combine competencies in ways that address the full spectrum of information technology enablement and operational process redesign.

It goes without saying that we'll continue to bring on board only consulting professionals who have deep experience with MEDITECH application modules and the operational processes that they are intended to support. Our team of individual consultants have years of experience with MEDITECH applications. They're people who have actually served as caregivers, business leaders, and department managers in MEDITECH environments. This gives us an unmatched capacity for understanding the real world needs of our hospital-based counterparts. Plus, our close working relationship with MEDITECH helps us ask the right questions, and get the right answers for our clients.

Our group is not only ready with the right measure of expertise, but it is also organized geographically. We fully appreciate the need to stay abreast of the local healthcare market trends and drivers, and being local and connected are important aspects of keeping directly involved.

Now that you've had this brief overview of JJWild's commitment to consulting, we'll use this space in the future to keep you informed about practical issues centered on the application of MEDITECH information technology management and value exploitation. If you have any questions about our Consulting Services Group or would like more information, feel free to call your JJWild account representative or email us at [editor@JJWild.com](mailto:editor@JJWild.com).

*Paul Peck, Vice President of Consulting, has over 25 years of healthcare experience, and focuses on developing leadership skills, methods, and tools that predictably deliver the benefits of IT initiatives on time and on budget. His areas of expertise include IT strategic planning, project management, administration and financial management, patient care, clinical decision support software applications, and technology infrastructure for the acute care and physician practice environments.*
