

JJWild's Core Solutions

From high-level strategic planning to hands-on application and technology implementation, JJWild can help you make the most of your MEDITECH investment. We customize solutions to meet your organizational needs, budgets, and resource availability. With a full range of products and services designed to optimize the value of your MEDITECH system throughout its lifetime, we can help you engage your workforce, transform your processes, and enable your technology to achieve your goals. Our core solutions include:

Technology Solutions

IT Infrastructure Design, Selection, and Deployment

Deploying MEDITECH for the first time? Refreshing existing platforms? Whatever the case, JJWild can guide you to the solutions that are right for your organization. We work hand-in-hand with partners like Dell, EMC, HP, IBM, and Stratus to offer you an unmatched level of choice. Together with MEDITECH we co-develop, test, and certify all our solutions in our on-site test and certification lab to ensure compatibility with your MEDITECH HCIS and compliance with MEDITECH's performance standards.

Disaster Recovery/Healthcare Operational Continuance

JJWild can tailor a disaster recovery solution to your hospital's unique requirements. You can host the system yourself or we can manage it for you at our state-of-the-art disaster recovery facility. And, our solutions include the consulting expertise necessary to develop operational continuance plans that can keep your organization up and running—in the event your IT system isn't.

Information Lifecycle Management

With the ever-increasing amount of information exchanged today, it is important to manage that data, from creation to disposal, in a manner that aligns your costs with the changing value of the data. JJWild's Information Lifecycle Management solutions are designed to meet the data management needs of your enterprise.

Managed Services

JJWild offers managed services to help you enhance the business value of your MEDITECH System and IT investment through improved operational efficiency and mission-critical support. With our fully managed Disaster Recovery solution called JSite as well as our remote managed service for MEDITECH VPN (Virtual Private Network), we allow you to focus on key strategic issues while we ensure that your MEDITECH applications are always available and secure.

Mission-Critical Support

JJWild will serve as your single point of contact, leveraging our strong industry partnerships on your behalf. We will facilitate communication and teamwork to quickly identify issues and implement optimal solutions for your organization. With the most MEDITECH-experienced systems engineers at your service, you can count on us 24/7 for in-depth knowledge of your MEDITECH system and hassle free resolution of your issue.

Clinical and Business Solutions

Application Implementation

JJWild will help you leverage the value of your MEDITECH modules and ensure user buy-in by assisting with application set-up, aligning your clinical and business processes, and providing Go-Live and post Go-Live support.

Application Optimization

Maximizing the functionality of your MEDITECH modules can reduce costs and improve quality of care but it requires thorough knowledge of the applications and the ability to identify where they are being underutilized. When you partner with JJWild, you get unmatched application expertise, proven programs for rapid and ongoing assessment, and plans of action that will enable you to achieve enhanced results. Let us help you get the most benefit from your MEDITECH applications—and maximize your return on investment.

Clinical and Business Process Redesign

Having the right technologies and applications in place is pivotal in achieving the highest quality of care, but if the existing workflows aren't integrated properly, your users won't be able to leverage MEDITECH's full potential to the organization's benefit. JJWild's professional consultants will work closely with you to align your workflow processes to fully optimize your MEDITECH applications.

IT Strategic Planning and Management Solutions

IT Strategic Planning

Every organization needs a Strategic Information Technology Plan addressing their clinical and business needs. Through extensive experience, JJWild has carefully fine-tuned the methodologies and tools you need to develop and build a plan. These proven methodologies are complete with prioritized recommendations, timelines, and projected costs to guide and support your critical initiatives.

Project Management

In projects large or small, JJWild delivers project management with leadership, efficiency, and diligence. Our Project Directors work hand-in-hand with your staff, transferring their extensive knowledge to enhance your internal capabilities. Ensuring alignment of projected outcomes to enterprise objectives, we will work with you to identify and eliminate potential problems. A comprehensive, detailed plan for the life of your MEDITECH project assures you meet your goals—on time and on budget.

Executive Advisory Services

JJWild delivers high-level advisory services designed to make your planning dynamic and executable. Our goal is to be your trusted advisor, working with you to ensure your technology supports your strategy and processes, and is most effectively used by your people. Our completely objective approach provides you with honest, actionable feedback that will help you achieve your strategic goals.
